MOYER ON THE STAND IN HAYWOOD'S DEFENCE

President of Western Federation Denies Orchard's Statements

EXPLAINS DEFENCE OF MURDERER

Attorney Miller Was Engaged by Jack Simpkins-Cross-Examination Begins Today.

Boise, Idaho, July 10 .- Charles H. Moyer went on the stand today as a witness for his fellow-defendant. D. W. Haywood, and besides making positive den'al of all the crimes attributed to him and the other Federtributed to him and the other reduction leaders by Orchard, offered an explanation of the unsolicited appearance of the Western Federation of Miners as the defender of Harry Orchard after his arrest at Caldwell for the murder of Steunenberg.

Dawson, the well known local barrister, today, on his appointment as third judge in the Winnipeg district. the request of Simpkins that Moyer and Haywood subsequently advanced \$1,500 from the funds of the Federation to meet the expenses of defending Orchard. Moyer made a self-possessed address, and at the end of the long day the defense expressed satisfaction over both his testimony and the impression he had probably made on the jury. He is a man of good appearance and address, and his low pitched voice is of pleasing tone. He displayed some nervousness when he first faced the courtroom and the jury, but the examination had not proceeded far before he seemed quite at ease.

He will resume the stand at 9.30 tomorrow, when the state will enter upon its cross-examination. His direct testimony took a very wide latitude, and the way is open for an equally wide cross-examination. Senator Borah will be the state's ques-It is probable that the examination

It is probable that the examination of Moyer and Haywood will take up tail the remainder of the week.

Ever since the case against Haywood began there have been rumors of probability of a confession to Detective McFarland. According to the best possible information from reliable source there is not the slightest foundation for the reports. The statement has been that society women of Boise are interesting themselves in an effort to influence Mrs. Moyer to secure a confession from her husband. For such reports there is not the slightest foundation. A statement to this effect is authorized by counsel for both sides and both by counsel for both sides and both Moyer and his wife.

SAN FRANCISCO CORRUPTION

VICTORIA, B. C., THURSDAY, JULY 11, 1907

SAN FRANCISCO CORRUPTION

San Francisco, July 10.—Very little was accomplished today in the trial of Louis Glass, Assistant District Attorney Heney made to the Jury-the opening statement for the prosecution, in which he outlined the steps by which the state expects to prove that the president of the Pacific States Telephone company paid Supervisor Chas. Boxton, now temporary mayor of San Francisco, a \$5,000 bribe to vote against the Home Telephone company's application for a rival franchise. Then Dr. Boxton was called to the stand. Though he is to be the star witness of the people, his inquisition today was so skilfully interrupted by Attorney Delmas, or the defence, that when shortly before noon recess he gave way temporarily to Clerk Ryan, of the board of supervisors, nothing of vital importance had been elicited. The examination of Mr. Ryan, who has served the supervisorial board since 1883, was examined by the prosecution to establish the identity of the application submitted by the Home Telephone company and was momentarily interrupted by Delmas, whose views of what Heney might and might not ask under the law were at variance with those of the assistant district attorney. The minutes of the board were under examination to lead to the introduction of proof of the making of that application and the subsequent awarding of the franchise to the Home company when the forenoon session was adjourned.

Victoria Conservatives Will Greet Leader on Arrival Home Monday Evening

RECEPTION AT THE C.P. R. WHARF

Evening a Public Meet ing Will Be Held in the Victoria Theatre

Hon. Richard McBride, premier of British Columbia, is expected to return to Victoria on Monday next, and the Conservatives of this city have planned to give him a grand welcome home. A large number of citizens, independent in politics, will join in the demonstration in honor of the statesman, who, in his fight for better terms for the province, distinguished himself in the motherland.

If the premier should arrive, as expected, on Monday afternoon by the Princess Victoria from Vancouver, he will be met at the C. P. R. wharf by a large committee of representative citizens and a band. He will be escorted to his home and invited to attend a public meeting in the Victoria theatrat S o'clock in the evening when he will be presented with an illuminated address and a piece of plate suitably engraved.

F. S. Barnard, president of the Con-

address and a piece of plate suitably engraved.

F. S. Barnard, president of the Conservative Association, will preside at the meeting, and will make the presentations. It is anticipated that Premier McBride will make a speech in which he will deal with the important details of his mission to London on which he was so successful.

There will be a number of prominent citizens on the platform, and the band will also be in attendance at the meeting.

Ottawa, July 10.—The Dominion Fruit report, just issued, gives the yield prospects for the year, of which the following is a summary: Juno weather favorable on the whole. Effects of May frosts now apparent, but trees and fruits have not suffered much, except plums and cherries. Prospects for apples encouraging. Pear crop a medium to full yield. General outlook for plum hopeful, but Japan plums have deteriorated. British Columbia and Prince Edward Island crops will suffer. Cherries, fair crop; sweet varieties very light. Grapes make good growth everywher. The lateness of the season has dislocated the small fruit trade most seriously. Strawberries, a very short crop. General outlook for raspberries, a light crop; currants, especially red, yielding well where bushes are protected from worm. There is less risk in growing the currant than any other of the small fruits. Gooseberries, a medium to full crop. Blackberries, a medium crop. The late spring has very seriously reduced the aggregate of tomatoes. One correspondent reports the loss of 500,000 plants.

MONTHLY MEETING OF

Contracts Let for Improvements to Buildings-Other Routine Business

The regular monthly meeting of the school board was held at the super-intendant's office last evening. A number of matters of routine order were transacted, including the awarding of a contract for repairs to school buildings. At the conclusion of the regular session, the board in camera, dealt with a letter of complaint from the aggrieved parent of a pupil. Tenders on shingles were received as follows:

that the time for receiving tenders be extended an additional week. The permission was granted.

A letter from the city council with regard to the medical inspector in the schools was received. The council announced that the medical officer was prepared to make a weekly inspection of the schools for the sum of \$54 per month in addition to the present salary of \$100 per month.

The council was prepared to grant this, subject to the approval of the finance committee providing the board approved it. Some discussion followed. It was thought that the council did not realize the extent of the duties to be imposed. It would mean a separate examination of each pupil in each of the sixty-five or seventy class rooms. As the board was somewhat in the dark as to just what the inspection would be. Chairman Jay and Mrs. Jenkins were appointed a committee to wait on the board of health and lay the case before them. Trustee Riddell brought up the question of the grant to Mr. St. Clair to assist him in his work of instructing the children of the city in the natatory art. The council had been petitioned by that gentleman to place life saving apparatus at the Gorge park. The council did not acquiesce, It was thought it was the duty of the board to take action in the matter. Some considerable discussion followed. Vancouver, July 9.—Looking remarkably well after a four months' trip abroad, J. S. Emerson, the well known logger, returned to Vancouver this morning, accompanied by Mrs. Emerson and their son and daughter. The family enjoyed the trip in the British Isles and on the Continent. The itinerary included Italy, Switzerland and France, as well as a cruise in the Mediterranean.

"I am delighted to reach home again," said Mr. Emerson this morning. "In all my travels I found that the name and fame of British Columbia had preceded me. It was amazing the knowledge many people in Great Britain have regarding the remarkable growth of this province."

Klootchman and a Japanese Make Vicious Assaults

Vancouver, July 101—Two sorious affrays occurred at the north end of fracouver Island last week, according to advices brought down by the to advices brought down by the steamer Queen City the other day. W. S. Armstrong, provincial policeman at Herriot Bay, brought to Vancouver a klootchman, who may be tried on a charge of causing the death of a brave at Shoal Bay, Thurlow Bay, Thurlow Island.

During a drunken row, the woman attacked a number of Indians with a long table knife and injured one so seriously that he is not expected to live. The man was still alive when the steamer left on her southern trip, but he had slim chances of recovery. The klootchman will be tried in this city. city.

The other stabbing affair took place at the Beaver cannery on Rivers inlet. Te Japanese captain of the tugboat Hope, belonging to J. H. Todd & Sons, of Victoria, had a fight with another Japanese in the cannery, in which the former was stabbed and badly cut. His assallant was arrested and was being tried by the created and was being tried by the conservative party of the Do-in minlon. Holyhead, July 10.—Plain clothes officers who accompanied King Edward and Queen Alexandra on their tour of Wales, took a suspicious-looking individual into custody. The man had hidden in the bushes alongside the approach to the residence of Sir Richard Bulkeley, just before the arrival of the King and Queen. As soon as he was discovered he made frantic efforts to escape, but was captured. The police had difficulty in protecting him from the vengeance of an excited crowd of people. The identity of the man has not been divulged.

Facts for Smokers

Facts for Smokers

Physicians, chemists and physiologists (many of them smokers themselves) agree that smoking before maturity is reached always leads to a waste of nerve power and brain force, and thus squanders life by weakening the very centre of strength.

In all Lord Wolseley's campalgns he made it a rule, where possible, to allow each soldier one pound of tobaccoper month, which he considered a fair allowance. In Italy the military authorities recognize the weed as one of the comforts essential to the troops, and cigars are served out to them with their daily rations.

In France there are 6,000,000 smokers, and of every fifteen there are eight who smoke a pipe five who smoke cigars, and only two who are cigarette smokers. Still, the French consume more than 800,000,000 cigarettes a year, or enough to go around the world 500 times if they were placed end to end in a line.

NATIVE PREJUDICES

Different Races and Creeds Would Work Together—British Rule Necessary

Rev H. F. Laflamme, traveling secretary of the Student Volunteer movement for foreign missions, who was in the city Tuesday for the purpose of delivering an address on his chosen theme, has many interesting, things to tell of his work in Britain's great eastern empire. His work during his furlough from active labors in the mission field to which he is assigned, that of the Madras presidency, is visiting the colleges of the United States and Canada for the purpose of interesting the young men and women in the great work of evangelizing India. Securing volunteers for this warfare is his work now.

The movement among the colleges began some 20 years ago and as a result of the first year's efforts 2,100 volunteered for mission work. This was a magnificent expression of the youth of the country to go out into the vineyard and work for the Lord. But, owing to the unpreparedness of the mission boards, a number could not be handled. An apathy followed on account of so many disappointments, but the interest was now reavesteement.

SWIND OF THE SWIND

possibility.

It was not generally known, but it was true, nevertheless, that Britain was handing over to the capable and educated Indians as much of the political power of the country as they could handle, and more, was so diplomatically handling the antagonistic factions that they did not clash or meet in conflict. A great many responsible posts of office were now held by educated Hindus; in fact except the critically superior officers all were open to the Hindus. There were muchipal institutions which were elective, somewhat like county councils to which the Indian was eligible.

There was a manifest dissatisfaction with what might be called a land tax or land rental. All lands were held by the government, but the complaint was not weil founded for the occupier.

of lands paid only a very small rental for their property. There was also a salt tax, the manufacture of salt bring a government monopoly. There was

an excise tax on wines, spirits and malt liquors and a 5 per cent, revenue tax.

The facts were that India was the cheapest governed country in the world, and that British control was the only fitting rule to maintain peace among so many hostile camps, creeds, and casts.

While there were but three great religions, the Hindus, the Mohamedans and Budhists, there are 47 different races speaking 200 languages, and these again represent at least 100,000 hostile camps, each ready to fly at the others throats and wage war to extermination. This was the problem Britain had to dear with, and this was the problem she so successfully handled as to maintain national political peace.

Mr. Laflamme is located in his work in Madras to which post he will shortily return. He says that notwithstanding missionary work has been going on in India for two centuries there are 100,000,000 Indians who have never yet heard the name of Jesus Christ and would stand with open mouthed wonder if you were to speak of him, his life or his works.

than 5,000 men and women gathered in the state armory.

Dr. Laflamme made an unexpected attack on denominationalism in the course of his address, declaring that the reason the entire world has not been evangelized is because the Protestant faith is divided into many sects. He urged upon the Baptist church to do its share, adding:

"We have been tottering and fooling with our missions and the time has come when we must settle down to business. We should have at least 8,000 missionaries in our outposts. People are looking for some substitute to take the place of war. I ask you to put missionary work in that place, for it is war if ever there was one.

"The thing which is now keeping."

was one.

"The thing which is now keeping God from the heart of India and from the heart of Africa is denominationalism. The only way in which we can win this battle is to evangelize the world in this generation. We must get together, forget our little differences, stand shoulder to shoulder as the church of God and fight the common fee, paganism.

church of God and fight the common foe, paganism.

This work has to be done, and if you Baptists prove to be laggards, if you do not do your duty when the Judgment day comes, I shall bring up the matter before the throne of God. It is your duty and you must attend to it.

"Conventions to try to settle upon some creed which will be acceptable to all can do no good. You must do what we missionaries have done over yonder—realise that we worship but one God.

"The denominations are keeping us from victory. They are tying up in many churches and in many equipments the money that should go to the support of that army of Christian workers in the field. The churches must unite, and in uniting they must band into one great army that will sweep victorious around the world."

Wardner, B. C., July 2.—(Special correspondence).—A very sad drowning accident occurred at about 5:30 p. m. on Tuesday afternoon in the Kootenay, river, which is very high at the present time. IMPROVEMENTS IN CANNERIES A Forward Stride in Better Methods of Handling Fish Marks Each Season

Very few who visit the Fraser river canneries at this time of the year would have any idea, inspecting them without ever having seen them in full swing, of the enormous activity that prevails there during the fishing season and the manner in which hundreds of thousands of great salmon are caught, prepared, and turned out ready for the market daily, says the Vancouver World. At the present time there is very-little work going on at the canneries, although some engineers are busy installing new machinery for the season. It may seem rather early, but the fact is that once the run starts in earnest there is little or no time to have this very necessary work done, and it has all to be completed far in advance of the anticipated rush.

Never before in the history of the Very few who visit the Fraser river

advance of the anticipated rush.

Never before in the history of the canneries has there been such a great rush to install new machinery. Of course every successive year has seen some important improvements but the installation of good machinery this year is certainly far in advance of that of any other season. A very important item this year that is well worthy of mention from its importance to local consumers is the fact that the arrangements are so perfect that after the big fish leaves the boat from which it was captured all handling of it ends then and there.

After it is thrown up on the wharf

After it is thrown up on the wharf by the fisherman it is handled from then on solely by machinery and the arrangements for so doing are abso-

arrangements for so doing are absolutely perfect.

One might visit a great many factories or similar institutions in any part of the world without finding such a fine array of machinery in use. Each machine is evidently the result of years of careful thought and study by men who have followed the business all their lives and are fully aware of the necessities in that line. The fish's taken from the boat by a huge conveyor which actually conveys it to the inside of the building and dumps it down on the floor where the operator is waiting, standing before the huge machine known as the Iron Chink. This singular name arises from the fact that the machine will easily perform the work of a great many Chinamen. No longer will it be necessary to have line after line of industrious Chinamen standing before the benches waiting with knives ready for the fish but the Iron Chink now does that part of the work. Fitted, as it is, with many cuirious and intricate designs of knives and cutters, the machine takes the fish, as it comes from the water, and rapidly and cleanly cuts off the head, fins and tail, and cleans the en-

many curious and intricate designs of kinves and cutters, the machine takes the fish, as it comes from the water, and rapidly and cleanly cuts off the head, fins and tail, and cleans the entrails out. This is done very rapidly, so rapidly that thousands of fish each hour will pass to the other machines. Then the fish is taken to the big revolving cutter which cuts it into slices ready for the tin. It is then carried on trays, fresh and clean, to the canning benches, where it is packed into cans. Passing down a long belt, the can is covered and finally soldered, all by machinery, and thoroughly cleaned. Passing still further down it is cleaned again, and then taken over to the test tanks. They are big tanks of water where the cans are submerged, and, should they leak the least bit, are at once taken out and recovered. They are then taken to the retorts, first passing through another cleaning process, and there, after being tested, are put into the great oven, and allowed to remain an hour in about 240 degrees of heat. As they have previously passed through about 150 degrees this cooks the fish thoroughly, and it is then ready to be labelled.

But to get to the room where the labels are put on the cans must go through another cleaning process, this time being finally cleaned and sprayed. They are then passed on to the room where they are labelled by machinery, and are ready to be packed up and sent out.

It will be seen that the fish is kept very clean in this process, and more and convince them of the magnitude of

A number of witnesses were examined yesterday. Major McFarlane gave his version of the killing of the bull contending that it was done in self-defence. He had been bothered by cattle on his premises and drove them off. Subsequently he again had to drive them away when the bull charged him and he shot it to protect himself. Other witnesses examined were Arthur W. Clayton, a neighbor, a boy named Wille Hawkins and the defendant, F. W. Garnett. The defence aims to prove the statements made at the time of the prosecution of the major, and which were reiterated in the letter on which the libel suit is founded. At adjournment Mr. Carnett was still on the stand.

TROUT ARE PLACED IN PROSPECT LAKE

Hatcheries Passed Through Yesterday

The last consignment of young brook trout from the Bon Accord hatchery on the Fraser river, four miles from New Westminster, for Prospect lake passed through the city yesterday and were liberated in the afternoon in their new home. Yesterday's consignment, which numbered about 20,000, arrived by the Dominion government steamer Georgia in charge of William Roxburgh, manager of the hatchery. They reached here in good shape, and will it is expected thrive in Prospect lake.

Great care was taken with the trout in transit. On the journey on board the Georgia the water was changed from time to time from a 'stock of hatchery water carried for the purpose. The temperature of the water was kept down by means of ice to about 47 degrees. On the journey to Prospect lake the trout, were most carefully shaded in such a way as to give them plenty of air, but at the same time guarding them from any undue rise of temperature. The trout vary from about an inch to perhaps an inch and a quarter in size. From the egg state to the present, the time taken in the development process has occupied about four or live months.

ACTIVE PREPARATIONS FOR THE FALL FAIR

Work on the Erection of New Man Suffering from Dread Dis-Stables Will Commence

Active preparations for the fall fair are being proceeded with. Work upon the new stables, one of twenty-four box stalls in the exhibition grounds proper and another of twenty-four box stalls on the race track grounds, will be commenced today, much of the lumber for this and for the additions to the grandstand being already upon the seene. It is the intention to lengthen the grand stand about seventy feet and to add bleachers, when the total capacity will be sufficient to seat 3,000 people.

Some surprise and a good deal of comment is elleited by the fact that there are no preparations afoot on the part of Saanich to prepare an exhibit to compete for the Massey, Harris challenge trophy and the prize of \$250 for the best exhibit of agricultural products from any district. The first year there were three exhibits, Saanich taking part, but the trophy was won a second time by the exhibit from the upcountry district, and it was won a second time by the exhibits to Winnipeg and refusing to take part in the local exhibition. The fair will be visited by a large number from the middle west and by the showing there made, the character of the districts will be guaged.

"If chilliwack carries off the trophy, it will look as if we are booming the mainland," said one gentleman yesterday.

It is pointed out that the cost of bringing exhibits from Saanich, from the middle out that the cost of bringing exhibits from Saanich, from the single propers.

mainland," said one gentleman yesterday.

It is pointed out that the cost of bringing exhibits from Saanich, from the islands and from Cowichan is far less than that from Chilliwack, where railway freight must be paid. The prize of \$250 is more than sufficient to pay the cost of getting the exhibit together.

The entries are coming in rapidly. Chief Chillichicans of the Nicola tribe of Indians has informed the secretary of the association of the intention of a number of the members of his tribe to enter the rough riding contest.

COURT MUST DETERMINE TENANT'S RESPONSIBILITY

Cwner of House Sues for Damages
Through Freezing of Radiators
Last Winter

The liability of a tenant for the care of a rented house is the point at issue in a suit brought by Fred B. Warren to recover a claim for \$317.05 against W. G. Winterburn in the County court before His Honor Judge Lampman yesterday. The claim is for damages sustained during the cold snap last winter to the radiators in the plaintiff's house, which was rented by the defendant, because of negligence on the part of the defendant in not having fires going and in not taking care of them. The radiators froze up and burst flooding the house with water. The house is the one on Belcher street lately nwned by T. M. Henderson.

The defendant claimed that he had taken all reasonable precautions, but that the cold weather was of an unprecedented nature in British Columbia, and he was, therefore, not responsible. It was asserted that the defendant was under no obligation to keep the radiators from freezing anyway.

The case was adjourned till Tuesday

Capt. Phillipps-Woiley Says Lack of Them Will Arrest Island's Progress

If something is not done speedily to If something is not done speedily to supply people with domestic and farm labor there will soon be as many people going out as there are coming in. It is useless to advertise the sport and pleasures of our country life to people who, when they come here, find that they have no time to do anything except their own cooking and chores." So said Mr. Phillipps-Wolley, who has been in this country for about 20 years and has just come in from a cruise through the islands of the Gulf of Georgia, where he says all men are of this way of thinking,

Doministic government at animor closed property of the challenger and the contract of the challenger and the contract of the challenger and the contract of the challenger and the chall

of immigrant.

Asked whether the Gulf of Georgia was filing up Mr. Phillips-Wolley replied that the interviewer should have been at the Cowichan regatta to see for himself.

He said that the gulf climate was better than that of Victoria in that the islands escaped Victoria's cold wind and rarely, if ever, suffered from frost; that every island was taken up by people who could afford to make their properties into paradises and that the number of smart launches and boats at Cowichan told the story of the class at Cowichan told the story of the class which had settled there,

island orchards, say \$100 per acre, with luck and judgment, but he considered that the country lent itself mest to small allotments and intensive farming. Any man could knock \$1 a day out of the land, but no man could have anything for himself if he paid \$45 a month and board to his man, and the captain concluded: "I dont believe that labor wants to keep out the yoor white man, and I shan't believe it even if the labor leaders tell me so. The leaders may say what they like, but if other people had the courage to fight they would find the bulk of the laboring men would vote with them, knowing that skilled labor cannot continue to make big wages unless there is an abundance of cheap non-skilled labor to supplement its efforts.

What the laborer really needs in

efforts.

What the laborer really needs in this country is some effort on the part of capital to make his job an all the year round job instead of paying him impossible prices for a few months and then asking him to live on his fat during the winter."

AN EARLY CALL.

One bitter December night Orion (Mark Twain's brother) sat up reading until 3 o'clock in the morning and then without looking at the clock, sailed forth to call on a young lady. He hammered and hammered at the door; couldn't get any response; didn't understand it. Anybody else would have regarded that as an indication of some kind or other and pone home, but Orion didn't draw in ferences. He merely hammered and hammered and finally the father of the girl appeared at the door in a dressing gown. He had a candle in his hand, and the dressing gown was all the clothing he had on, except an expression of welcome, which was satilitied and so large that it extended all down his front to his instep and nearly walked in. The old gentleman took him into the parlor, set the candle on a table and stood. Orion pade the usual remarks about the weather and sat down—sat down and talked and some remark to the extended and down his front to his instep and nearly walked in. Keep Your Bills

In all businesses, no matter how small, a certain system is observed, and there is no reason why the housewife should not adopt some simple rules. Why not try and begin to keep the bills of the household in a systematic way. Every housekeeper has, on one occasion or another, experienced a dispute with a dishonest or perhaps careless tradesman, and felt a certain gratification when the confronted him with a receipted bill when he demanded payment the second time. But there is also the other side; when the housewife is positive that she paid the bill and remembers distinctly receiving the receipt, but where did she put it? Some bills are on a nall in the kitchen, others are thrust in a drawer, and still others may be in an old pitcher on the dresser; but the one in question cannot be found, at any rate not at the moment. Now the simplest possible thing is to get a box-file, and there are different styles of these which are readily procurable at the office supply department. This is so arranged that a great number of bills may be cared for under each letter and are to be had at a moment's notice. These boxes are very inexpensive, varying in price from fifteen to twenty-five cents each, and will hold the accumulated bills for several years. This is a decided advantage, for the great majority of bills should be preserved for at least two years, as frequently disputes will arise at even this late date. urner, 631. CHINESE TO STOP SMOKING OF OPIUM

Edict Against the Poppy Came Into Force Monday—Much Interest Here

On Monday last, which in China was the first day of the sixth month of the 27th year of Kwangsu, the new anti-oplum edict came into effect and Chinese in Victoria are much interested in its enactment. While the edict will, of course, not be effective here, efforts will be made by prominent Chinese of the local colony to put down oplum-smoking. A branch of the Anti-Oplum Society recently organized at San Francisco will probably be organized in Victoria. This society proposes to furnish medicine to confirmed oplum smokers to counteract their desire for the drug of the poppy. The new edict aims to put a stop

The new edict aims to put a stop to opium smoking within ten years. For the present all opium dens in Chinese cities will be closed and an arrangement made whereby all opium smokers must apply in person to the authorities for opium. Arrangements will be made set that each outfit will authorities for opium. Arrangements will be made so that each outfit will be stamped. The smoker's photograph will be registered at all places where th drug is sold, and each smoker will be compelled to furnish government officers with the amount required by him daily. This amount will be gradually reduced.

It is a moot question whether birds suddenly recover from fright or sham death to effect their escape when captured. A man living in one of the houses in Park Row, London, is a possessor of a fine old Persian tabby cat, which not infrequently makes a raid on. Hyde Park, and returns home with a fat prize. The other day one of the maids met puss climbing leisurely upstairs with a sparrow in her mouth. He was making the peculiar muffled "mowwow" that meant "here's fun." The bird's head dangled limply, its eyes were half shut, one wing was trailing, and feathers were missing from its tail. The owner of the house and the cat happened to come downstairs at the time, and the maid drew his attention to puss and the bird. The cat laid the sparrow at their feet with pride. The maid stooped to take the bird in her hand, when it suddenly shot up and flew straight out of an open window. It had evidently not been hurt by the cat, which was so angry that it tried to jump out of the window, to.

for Schedule of Games

The Victoria amateur baseball team will hold, a practice this evening at Oak Bay park, after which there will be a general meeting of the players to discuss arrangements for a number of games to be held in the near future. The club has a number of applications for that date and is negotiating for the use of the Oak Bay park for the balance of the season. A reply from the Vancouver amateur team with reference to the game to be played here next week has not yet been received, but it is altogether probable the game will be played.

That Is All Bill Gets as a Result of His Mix-Up With Tommy Burns

Francisco, July 10 .- Barney San Francisco, July 10.—Barney Reynolds, the man who came here as the traveling representative of Bookmaker Jack Wrenn, of Australia backr of Bill Squires, is a practical fellow, Wrenn, it appears has a contract with Squires which will not expire—for eighteen months. Wrenn firmly believed that Squires was a world-beater and he proposed sending him to England after Bosher Bill had devastated the ranks of American heavyweights, heavyweights.

In the light of what happened Thursday afternoon Reynolds cabled Wren to know if he wished to "recall" Squires. Yesterday Reynolds received the following cable: "Barney Reynolds, San Rafael, Calif.

"Result has cast gloom over all Australia. Cheer up." "I have no objection to their treating the thing as a national calamity, but wanted instructions more than sympathy," complained Barney,

pathy," complained Barney.

Under the circumstances it is quite likely that Reynolds will use his own judgment and leave Squires in this country, returning to Australia himself to tell how it happened. When it was suggested that Squires might object to remaining in a strange land when he was under the shadow of defeat Reynolds explained that the contract already referred to compelled Squires to do whatever Wren or Wren's representative directed.

There will be doubt in regard to Squire's movements, however, until something further is heard from Wren. Billy Delaney, Jim Jeffries and others have advised that Squires remain here and seek a match with Mike Schreck. They seem to think that the Australian is not such a poor workman as his showing with Burns stiggested and that, given another chance, he may make a more favorable impression with the sports of this country.

Tommy Burns the Canadian heavy-weight who is now the undisputed champion of the world has been fighting before the public since 1900 graduating from lacrosse player to boxer when he was 19 years of age. He is now 26 and to date has engaged in 46 battles. He has never been knocked out and has only lost three decisions, one each to Mike Schreck in, ten rounds, Jack O'Brien, six rounds and Twin Sullivan in 20 rounds. Subsequently he drew with Schreck in a six round tilt and beat O'Brien, so that the only black mark on his record is that defeat by Sullivan. Mr. Brandrith briefly outlined the history and objects of the B. C. Growers, association and showed what it had done for the industry in the way of cheapening supplies and materials. It was also shown that the association had done much in the way of securing better express and freight rates for shippers. At the conclusion of Mr. Brandrith's remarks a general discussion as to membership, affiliation, etc., was indulged in. After light had been thrown on the subject by this means, a number of local growers had themselves enrolled as members.

The balance of the evening was taken up by Mr. Kipp, who demonstrated the best methods of planting and pruning trees.

TO BE BUILT AT ONCE

The new school for Victoria West will be constructed not upon the In-dian reserve, but upon the westerly section of the present site for the school.

section of the present site for the school.

Such was the decision of the school board at the regular monthly meeting last night.

It was decided to proceed with the work immediately and the board's architect will be requested to be present at the next session to consult with the board. The 'school, according to the resolution, is not to cost more than \$30,000. All the members of the board with the exception of Mrs. Jenkins voted in favor of it.

The matter was brought up by Trustee Riddell, who introduced in following resolution: "Be it resolved that this board immediately proceed with the erection of a schoolhouse at Victoria West on the most westerly part of the present school site not now occupied by the present building the cost of which shall not exceed \$30,000."

The resolution was seconded by Trustee McKeown, In support of the

The resolution was seconded by Trustee McKeown. In support of the proposal, Mr. Riddell stated that the general consensus of opinion in Victoria West was in favor of the present site. It commanded a magnificent view of the sea and the Olympic mountains.

Mrs. Jenkins did not favor such action. She did not believe that the children would spend much time in gazing upon the beauties of the scenery, the sea or the Olympic mountains. She believed that a public meeting of the residents of Victoria West had placed themselves on record as in favor of the proposed site on the Indian reserve. She thought that the matter should be left until that problem was solved.

Trustee McKeown did not agree with Mrs. Jenkins, The meeting in question had not been a representative gathering. He had been conformed by a number of citizens of the district in question that the proposed site on the Indian reserve would prove distasteful to them. He himself could not see the advantage of playing the school in one corner of the district which would not be convenient for three quarters of the pupils in attendance.

The resolution was put to the vote

Yesterday Messrs. Moresby & O'Rellly received the following letter dated July 4, from F. Pelletier, acting under secretary of state for Canada: "With reference to the claim put forward by Mr. Findley against the Russian government, I have the honor to inform you that his excellency the governor-general is advised by Lord Elgin that no answer having been received from that government, His Majesty's ambassador at St. Petersburg has been instructed to take such steps as he properly can to expedite a reply."

has been instructed to take such steps as he properly can to expedite a reply."

Mr. Findley, who is now engaged in sealing on one of the Victoria sealing schooners, shipped on the schooner Hokusel Maru at Hakodate, Japan, on Feb. 17, 1905, and proceeded to the Sea of Japan on a sealing voyage, and on May 10 the Russian cruiser Gromobol overhauled the Hokusel Maru. Officers of the Russian man-of-war boarded the Japanese sealing vessel and Findley and all others on board the schooner were taken off and imprisoned on board the Russian cruiser. The Hokusel Maru was then taken in tow by the Gromobol. Shortly afterward the scaling vessel was torpedoed and sunk.

The Victoria scaler, who is now claiming to be recompensed for his loss, was thrown into prison at Vladivostok on the arrival of the Gromobol at the fortress, then the base of a Russian squadron. Ho was later placed on board the prison ship Argoon and held there for 21 days, being fed on poor diet. After his imprisonment on the Argoon he was handed over to the military officers and was sent to the garrison at Medvied, where for 90 days he was detained, and finally freed, without funds or anything else but a passport authorizing him to leave Russia.

After making his way across Siberia and Europe, Mr. Findley finally made

The steamer Wangard, a German freighter chartered by the Wellington Colliery company to carry a cargo of colliery company to the Wellington of the Wangard was at Chemalnus in May when the fire took place at No. 4 slope, and was delayed as a result. Now that normal operations have been resumed at the mine the company has managed to load the vessel, as well as supply the many vessels coming for coal previously contracted for. The Wangard, though on the charter to the colliery company, was left swinging at her anchor in Union and the delay proved a costly one to the mine owners. The Wangard both will probably sail today. United States Government to Seek to Capture Alleged Murderer

United States Government to Seek to Capture Alleged Murderer

Last fall when the United States Thetis returned from Alaskan waters news was given in these columns of an alleged murder by the captain of a whaling vessel who left his vessel and took up his residence with his native wife and family on the Arctic coast. In this connection a Nome despatch says: "That the United States government is determined to put a stop to the brutalities which have been committed by the captains of whaling vessels in the Arctic cocan is demonstrated in the fact that captain O. M. Munger will be stationed at Dutch harbor all summer, subject to a call from the Nome authorities, while the revenue cutter Thetis will patrol the Bering sea and the waters leading into the Arctic ocean.

An effort will be made to capture captain Klinkenberg afterwards killed two other men, who were witnesses to his crime. In the winter he was reported to be still at Point Barrow.

An end is to be put to the practice of carrying native crews on the whalers and especially women, and that the natives will be given protection in other ways.

The Russian government will also

in other ways.

The Russian government will also have a couple of cutters patrolling the coast of Siberia, and the illicit whiskey vending to the natives, which has been responsible for so many murders and other crimes, will be stamped out. The whalers have been in the habit of shipping whiskey in coal oil cans and boxes marked "Canned Beef."

The practice of giving whiskey to the natives in exchange for their furs and whalebone leads them to spend the summer months in wild orgies of drunkenness, and as a result no provision is made for the coming winter, when food is scarce. Then follows a long period of starvation and hardship and a consequent decrease in population.

The gold has been carried in ordinary mail sakes and the bullion has been sealed in cans of this weight. The gold has been carried in ordinary mail sakes and the publication on the occasion of much wealth handled carelessly as the mail matter usually is in the northern country.

When it was learned that the gold was being refused by the steamship companies, Acting Second Assistant Postmaster-General Holloday investigated the contract the government of the contract the gold with the province of the province of the deliar, is thought that the province and the province of water on the part of the corporation to do so. If the province of the province of the province of the province of the pr

dent Peabody took the stand that as the company's bond for the carrying of mail was \$10,000 it would be cheaper for it to let the contract go than to accept shipments which would be created the contract contract of the contract as the company's bond for the carrying of mail was \$10,000 it would be cheapered to be contracted to the contract of the

to accept shipments which would be a great risk.
Although the Alaska Steamship company has the limited liability liability clause inserted in its contract, the government holds that the clause is worthless, as there is in the courts now a suit against the Alaska Steamship company for \$1,500 for the loss of the registered mail which was lost at the time of the wreck of the Clallam. Should a mail shipment of gold be lost the result would be that the government would have a lien on the company for the amount lost, despite the limited liability clause in its contract.

The Power Question.

Sir.—I have tried in vain several times, through the agency of your columns, to induce his worship the mayor to tell us why, if, as he and is the mayor to tell us why, if, as he and is the mayor to tell us why, if, as he and is the mayor to tell us why, if, as he and is the mayor to tell us why, if, as he and is the mayor to to tell us why, if, as he and is the mayor to to the same for sprinkling after in Thomayor told us, in his letter to you some days ago, that ten minutes' sprinkling upon a lawn was quite sufficient for one week. He also insinuated that it was immaterial whether this was done in the day time or night time. In view of these statements, permit me to draw your attention to the fact that the city generally chooses the night time for the watering of their small patch of lawn at the northern end of the causeway, and they do no confine themselves to the including the manyor to reach the cosast at the earliest posting the western boundary of their problems running on this they have been moved, and found that, although the lawn was apparently not being watered, the hose was stretched along the western boundary of the lot, the sprinkler removed, but still a full pipe of water running on the same spot, with every indication that the intention was that it should run all night. I passed this same it again last night (Tuesday), about o'clock, and found hord sprinklers running on the same spot, with every indication that the intention was that it should run all night. I passed this same it again last night (Tuesday), about o'clock, and found hord sprinklers running on the same spot, with every indication that the intention was that it should run all night. I passed this same it again visited the piace, and fund the same condition of affairs still existing, the pipes not having been moved, as I thought, but, not feeling sure, I took special notice of their nosition, went away, and returned again at 13 minutes to 11, when I found taem of the canadian Northern secured for the total conten

STRENUOUS ENDEAVORS TO CAUSE WAR SCARE

Alarmist Report from the Hague via London—Denials from Washington.

London, July 10.—The correspondent of the Daily Telegraph, at the Hague, sends in a column despatch which purports to reflect the views prevailing there on the Japanese-American situation, which he declares to be more absorbing than the conference itself. The correspondent says that as a result of his enquiries he learns that the situation is really strained, although both governments are trying to conceal the fact. He assert that since June 20th, the question has entered upon an acute phase. Japan has been sending the United States extremely categorical notes, stating without bitterness, but in the clearest terms, that unless Vushington is able to control California, Japan will consider herself free to act directly against California. Nothing, however, has been exchanged precluding a pacific settlement, but many of the Japanese at the Hague are of the opinion that the Japanese government ought to act without delay and not give America time to utilize her vast resources and greater than Japan's, to perfect warfike preparations. In an editorial the Telegraph says it does not identify itself with the statements of its correspondent at The Hague, believing them to be charged with undue despondency. At the same time, the paper continues, they are made upon notable authority, and they cannot be read without profound uneasiness. The Telegraph is convinced, however, that the statesmanship of both countries will be strong enough and the quiescence of the two great nations are enough to hold mad Chauvism in leash.

and a license obtained. The Marconi company has not secured such a ficense.

G. T. Legg, superintendent of the Union Steamship company, which has installed Marconi apparatus on board the company's steamer Carosoun, now on her way from this port to the north, when asked regarding exchange of messages between his steamer and the government stations, said he expected communication to be maintained despite the fact that the government stations were to be equipped with Shoemaker apparatus. He said that it was a matter for settlement between the Marconi company and the Dominion government. Mr. Legg will probably insist that the apparatus placed on board the Camosun be used to interchange messages with any other system.

An Ottawa dispatch says the Marconi company claims that its contract made with the government in 1902 gives them a monopoly of the Wireless business in Canada, to the explusion of all other wireless systems.

GOVERNMENT MAY

REFUSE LICENSE

The government will not admit such a sweeping monopoly. The dispute has been brought to a head by the installation of the Pacific wireless stations by the government and the avowed intention of the government to operate these stations itself. The Marconi company contend that they should have 1/6 or given the right to erect and equip these stations and operate them for all time the same as the Atlantic stations.
